# Modern Warmth. Timeless Style.

**The Schiedel Isokern Garden Fireplace and Outdoor Kitchens provide the perfect answer for enhancing your outdoor lifestyle.**

This remarkable centerpiece for any garden comes in 3 fireplace sizes and 2 outdoor kitchen styles, and is provided as a comprehensive packaged solution.

The natural volcanic pumice (obtained from the Hekla Volcano in Iceland) offers the necessary insulation for a secure and stunning focal point in any garden. The various sizes allow for placement against any wall, even in small gardens or yards where space is limited, as well as in larger outdoor areas.

The kit comprises chimney blocks, lip glue for assembly, firebricks, firebrick mortar, and a render for sealing joints or providing a complete rendered finish. This establishes the Garden Fireplace and Outdoor Kitchen as the premier choice for outdoor heating and living, offered by the foremost experts in chimney solutions.

# SMALL MODEL

Price including delivery and VAT: £1,014.22

\*This price was accurate at the time of print and is subject to change. Please visit the online store for the latest prices

The small model is more than just a fireplace; it's a robust, high-performance centerpiece engineered for longevity. Crafted from natural Icelandic pumice, it provides exceptional insulation, ensuring a safe and spectacular focal point for any garden—from sprawling estates to cosy urban courtyards.

## Design Versatility

The Isokern adapts to your vision. Its modular design allows for a minimalist, space-saving footprint or a grand, wide-profile installation with integrated side log stores.

## Performance & Durability

- All-Season Warmth: Designed to extend your outdoor season comfortably into the autumn and winter months.
- Compact Footprint: Ideal for placement against walls in smaller yards without sacrificing heat output.
- Complete Kit: Includes chimney blocks, lip glue, firebricks, mortar, capping, and render for a professional finish.

We suggest a 100mm thick concrete base to support the heavy build and prevent sinking or slanting.

**FREE LOG RETAINER & BARBECUE GRILL WITH THE SMALL MODEL!**

Feature	Detail
Fire Opening:	510mm (W) x 540mm (H)
Depth:	440mm
Total Weight:	460kg
Delivery:	1 Single Pallet

THE BOTTOM LOG STORE IS OPTIONAL. IF ADDED, NO EXTRA GLUE OR RENDER IS REQUIRED.

# MEDIUM MODEL

Price including delivery and VAT: £1,254.76

\*This price was accurate at the time of print and is subject to change. Please visit the online store for the latest prices

The versatile choice for any outdoor space, the medium model was famously featured on ITV's Love Your Garden with Alan Titchmarsh. Whether you are looking for a freestanding centerpiece or a sleek, wall-mounted installation, this mid-range model offers the perfect balance of size and performance.

## Why Volcanic Pumice?

Crafted from natural volcanic pumice, this fireplace provides world-class insulation. This allows the exterior to remain safe while the interior radiates intense heat—perfect for reclaiming your garden during the crisp autumn and winter months.

## Performance & Durability

- Adaptable Design: Can be installed freestanding, raised, or directly against a wall.
- Fully Load-Bearing: Engineered for structural integrity and ease of assembly.
- Custom Height: Need a taller profile? Simply add additional chimney blocks to suit your garden's architecture.

We suggest a 100mm thick concrete base to support the heavy build and prevent sinking or slanting.

# LARGE MODEL

Price including delivery and VAT: £1,565.56

\*This price was accurate at the time of print and is subject to change. Please visit the online store for the latest prices

Create a world-class atmosphere with the large model. As our flagship garden fireplace, it offers an expansive wide-screen view of the fire, framed by the natural, insulating power of volcanic pumice.

## Unrivalled Scale & Performance

The large model is engineered for those seeking a truly grand focal point. With an expansive wide opening, it provides a "wide-screen" view of the fire, radiating consistent warmth across large terraces and sprawling garden estates.

## Performance & Durability

- Flagship Durability: Built for high-performance use and a lifetime of weather-resistant comfort.
- 1180mm Opening: Our widest "wide-screen" aperture for maximum visual impact.
- Massive Thermal Mass: Over a tonne of pumice provides maximum heat retention long after the fire dims.

We suggest a 100mm thick concrete base to support the heavy build and prevent sinking or slanting.

# THE KINGHAM

Price including delivery and VAT: £2,981.12

\*This price was accurate at the time of print and is subject to change. Please visit the online store for the latest prices

The Kingham Volcanic Pumice Outdoor Kitchen, a culinary masterpiece crafted from the uniquely extraordinary and resilient volcanic pumice. This outdoor kitchen is not merely a cooking space and outdoor wood heater; it's a fusion of innovative design, natural beauty, and unmatched durability, redefining the art of al fresco dining, and is perfect to extend the use of your outdoor space during the colder Autumn and Winter months.

**FREE LOG RETAINER & ARGENTINE GRILL WITH THE KINGHAM!**

Feature	Detail
Fire Opening:	1180mm (W) x 720mm (H)
Depth:	640mm
Total Weight:	1490kg
Delivery:	3 Pallet Delivery

## Culinary Masterpiece

- Largest in Range: Our most impressive outdoor kitchen, providing a massive 3.4-meter wide presence for a truly world-class garden setup.
- Pressure-Treated Timber: Features premium, tanalised redwood pine panelling and doors, engineered to withstand the harshest autumn and winter elements.
- Rapid Thermal Efficiency: Reaches peak cooking and heating temperatures quickly and retains warmth long after the fire is out.

We suggest a 100mm thick concrete base to support the heavy build and prevent sinking or slanting.

# FAQS

## 1. What is the fireplace made from?

All our outdoor fireplaces and kitchens are crafted from natural volcanic pumice, sourced directly from the Hekla Volcano in Iceland. This is a superior natural insulator, allowing the fireplace to reach optimum temperatures quickly while keeping the exterior surface significantly cooler than traditional brick or stone.

## 2. Can I install the fireplace against a garden wall or fence?

Yes. Due to the exceptional insulating properties of volcanic pumice, the exterior of the unit remains safe. This allows our models—particularly the compact 500 and the versatile Hale—to be placed in smaller gardens or directly against walls and boundaries where space is at a premium.

Model	Required Distance to Combustibles
500 Model & Hale	100mm
950, 1200, & Kingham	75mm

## 3. What kind of foundation is required?

Because our units range in weight from 460kg (Model 500) to 1.5 tonnes (The Kingham), a solid foundation is essential. We strictly recommend a 100mm thick reinforced concrete base to ensure the structure remains level and to prevent any sinking or slanting over time.

## 4. Is the fireplace difficult to assemble?

Our modular "slot-together" system includes specialised lip glue and firebrick mortar. While the components are heavy, the build is straightforward for a competent DIYer or tradesperson. Full digital instructions are provided.

## 5. Can I customise the appearance?

Yes. Leave the pumice in its natural grey or use the included render for a smooth, contemporary look. Once rendered, the unit can be painted with masonry paint to match your garden's aesthetic.

## 6. Can I use the fireplace for cooking?

Yes. All models double as high-performance grills. Kits include a log retainer, and additional grill sets can be added to transform your fireplace into a culinary centerpiece.

## 7. What fuel should I use?

We recommend seasoned dry wood for the best flame, or charcoal for cooking. Thanks to the pumice's heat retention, you'll use significantly less fuel than a standard firepit to maintain steady warmth.

## 8. How is the fireplace delivered?

Units arrive via palletised kerbside delivery. Please ensure adequate access for a large vehicle.

500 & 950: 1 Pallet

1200, Hale & Kingham: 2 Pallets

## 9. Can I increase the chimney height?

Yes. The modular design allows for additional chimney blocks. This is ideal for matching the scale of your home or clearing nearby structures and overhanging trees.
